**Subject:** Pavillion probe?

Dear Dominic, Hi, I hope that things go well for you and yours. I read in Nature, 27 June 2013, vol. 498 P 415, R.B. Jackson , et al. that EPA dropped it's probe of GW quality at Pavillion, WY. Is this true? I thought it was a well done report when I read it ~2.5 years ago. Give my regards to people there, Sincerely, Mike
